

# 2021.11.18現在での 問題点と対処法

colab\_tfbook/Chapter05/4. CNN interpretation – sensitive area detection.ipynb  
の

from tensorflow.keras import backend as K

実行時に下記のエラーが表示される場合の対処

tensorflow.python.framework.errors\_impl.AlreadyExistsError:

Another metric with the same name already exists.

# keras 2.7に起因する問題

- 対処法
  - keras 2.7だったら2.6.0に下げる
- pipenvの場合
  - pipenv uninstall keras
  - pipenv install keras==2.6.0

- 参考URL

Another metric with the same name already exists. #14266  
<https://github.com/huggingface/transformers/issues/14266>

frgfm commented 14 days ago • edited

Just FYI: the underlying problem actually seems to come from keras 2.7 after some investigation: [keras-team/keras#15585](https://github.com/keras-team/keras/issues/15585)  
meaning installing `keras==2.6.0` should solve the problem
